nit B6 What we have, that most mini storage units don't:

Well Lit Parking Lot

Our mini storage units have bright LED lights surrounding the entire unit, and are located right next to the very busy Highway 76. The better the lighting, the more secure. And there are plenty of sets of eyes keeping a watch out for suspicious behavior. The road we are on is a common route where patrol cars do drive by's for security purposes. Our main office is also across the street, so we keep a close eye during business hours.

Water Access

There is an outdoor well station where you can hook up to running water (non winter months). It makes it easy to giver your vehicle or equipment a quick wash before putting away, or fill your water tank before going on a trip.

RV Dump Station

There is an RV dump station on site that runs directly to our holding tank to dispose of your waste.

Easy Access

We have a double culvert driveway access and gravel all the way around the building so you can avoid having to back in or out of the facility. We also have units with larger than normal driveway spaces to aid in backing your equipment in and out of your unit.

24/ 7 Security Camera Surveillance on Entire Premise

Breezewood Rentals now has 24/7 security camera surveillance on the entire Neenah storage campus. We have cameras pointing in virtually every direction looking at all of the entry/exit points as well as the overhead storage doors themselves. These high end cameras are state of the art, infrared (can see at night), and have forensic zoom capabilities. You will not find this level of security at most other facilities.

These are not just fake "deterrent" cameras, but actually record all activity in the area 24/7 to not only deterr but to aid in law enforcement. In addition, we have a close relationship with the Winnebago County Sheriff who does drive by patrols and constantly monitors for suspicious activity.
